

# Emergency! Designs against COVID-19

Collaboration with  
The Design Museum of Barcelona

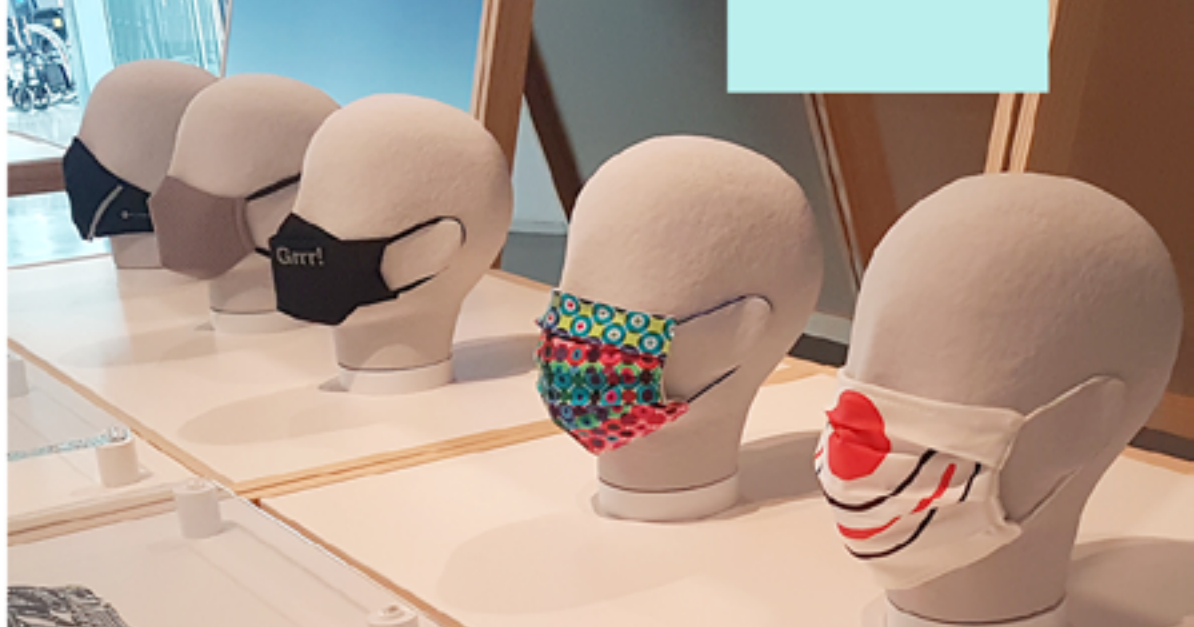

Pasqual Arnella collaborates with the Barcelona Design Museum for the unusual exhibition **Emergency! Designs against Covid-19**.

This project promoted by The Design Museum gathers together the multiple initiatives from the world of design that have offered a quick and effective response to the urgent health and social needs derived from the COVID-19 pandemic.

Design can save your life

From **Pasqual Arnella** we have collaborated with our paper pulp mannequins so that some of these designs, such as: masks, respirators or protective equipment, can be displayed in an adequate, realistic and **100% sustainable** way.

The exhibition can be visited from February 9 to March 14 at the Fernán Gómez Centro Cultural de la Villa, within the framework of the Madrid Design Festival.

## Our mannequins for the exhibition

**Gento**

Full-body mannequin

**Valira**

Female Head display

In this video, **Fulls d'Enginyeria** explains the exhibition and the 55 initiatives presented.
